ABSTRACT

2 An ostomy appliance and a mounting disc include an ostomy
3 pouch having a stoma receiving portal. The mounting disc is
4 sealed about the portal and includes a flexible plastic disc
5 having a convex central body portion and a surrounding annular
6 rim. A first foam disc having an outer diameter corresponding
7 to the outer diameter of the rim is adhesively adhered to the
8 plastic disc. A second foam disc is adhered to an adhesive face
9 of the first foam disc and has an outer diameter greater than the
10 plastic disc. A hydrocolloid skin shield disc having an outer
11 diameter corresponding to the outer diameter of the second foam
12 disc is adhesively adhered to an adhesive face of the second
13 disc.
